Personas

John is a 53-year-old who works as an insurance salesman at a popular company. He has his Bachelor's Degree in Marketing, he is a married father of two girls(19 and 21) and lives in a suburb of Chicago, IL. His family lives comfortably in a 3-bedroom home in an up-and-coming neighborhood. He likes being outdoors and likes to host numerous family BBQs throughout the summer.

He will be responsible for organizing the games. He will input player data which will form the teams. He is also responsible for inputting game points for each winner.

Johns would go to the homepage > input player data > he would create teams using player data > he would set up each game(bags, coin toss and redneck golf) > he would input game points for each winner > He would input winners for each game

Patrick is a 19-year-old college student who goes to school in Boulder, CO. He currently works at a Planet Fitness and is in school to get his Bachelors of Science Degree in Physical Education.

He is very active and likes to be on the move. His next goal is to finish a triathlon. He comes from a large family and finds family events exhausting.

He's responsible to coming up with his team name and inputting it in the web application.

User goes to the homepage > Teams have been created > he would use the input box to add his teams name > he would hit ENTER to save his teams name

Amy is a 45-year-old teacher who lives in Austin, TX. She has her Masters degree in Education and loves spending time at home with her husband and 3 kids (10, 14, and 16). She is an avid reader and enjoys her monthly book club with friends.

She's responsible for adding her teams point for winning a game.

User goes to the homepage> User locates current game that's been generated > User locates her teams game > User clicks on button to add game points > User inputs teams points for game

Stretch Goal: To add another game(Beersby) to the games section. We used to have 5 games but cut it back to 3 since we'd run out of time.

Task: User adds games points to the 4th game(Beersby) that's been set up.

User goes to the homepage> User locates current game that's been generated > User locates her teams game > User clicks on button to add game points > User inputs teams points for game(Beersby)
